

EZ Baccarat - How to Play

1. Begin by placing a wager and paying the appropriate collection.
2. Winning Player wagers pay even money.
3. Winning Banker wagers pay even money. Note: When the Banker hand wins with a 3-card total of 7, Player bets lose and Banker bets push.
4. Winning Tie bets pay 8 to 1.
5. The Panda 8 Bonus wins when the Player hand wins with a 3-card total of 8. When the Panda 8 Bonus wins, it pays 25 to 1. There is no chance for the Panda 8 Bonus bet to push.
6. The Dragon 7 Bonus bet wins when the Banker hand wins with a 3-card total of 7. When the Dragon 7 Bonus bet wins, it pays 40 to 1. In this instance, the Banker bets push and the Player bets lose. There is no chance for the Dragon 7 Bonus bet to push.
7. The best hands in EZ Baccarat are known as Naturals. The very best hand is a two-card total of 9, known as Natural 9. A two-card total of 8 is the second best hand and is known as Natural 8.
8. If either the Player or Banker hand contains a Natural, there is no draw and the highest Natural wins.

Hands then rank in the following order: 9,8,7,6,5,4,3,2,1,0.

EZ Baccarat - Game Rules

1. EZ Baccarat is played with eight (8) standard 52-card decks of cards. There are no jokers.
2. Two hands of cards are dealt. One hand is known as the "Player," the other hand is known as the "Banker."
NOTE: Bettors may bet on either the Player hand or Banker hand. These are simply the names of the two hands of cards dealt.
3. Bettors try to predict which hand, either Player or Banker, will have a total value closer to 9 at the conclusion of the hand.
4. Each hand will initially contain two (2) cards. The game is played according to pre-determined draw rules. (See "Draw Rules" chart for additional information.)
5. Any complete hand in EZ Baccarat will contain either two (2) or three (3) cards, depending upon whether or not a draw is required.
6. Card values are as follows:
Ace = 1
All # cards 2 - 9 are worth face value.
All 10's and Face cards are worth 0.
7. To determine the value of a hand, simply add the two cards together. For instance, a hand containing an Ace and a 4 is valued at 5. If the two cards equal more than 10, then subtract 10 from the total to determine the value of the hand. For instance, a hand that contains an 8 and a 5 adds up to 13. Subtract 10 and you are left with the correct hand value, which is 3.
8. The dealer deals the cards and, if applicable, completes the hands according to the pre-determined draw rules. The hands are then compared.
9. If the Player hand total is closer to 9 than the Banker hand total, the Player wagers win and the Banker wagers lose.
10. If the Banker hand total is closer to 9 than the Player hand total, the Banker wagers win and the Player wagers lose. Exception: A winning Banker hand with a total of 7 and containing three (3) cards is a push for the Banker wagers and a loss for the Player wagers.
11. If the Player hand total and the Banker hand total are of equal value, the Player and Banker wagers push.
