# How to Play

1. Begin by placing a wager on the “ante” and “blind” betting spots. The appropriate collection must be paid and the wagers placed on the “ante” and “blind” spots must be of equal value.
2. A player may also place a bet on the “trips” betting spot if he/she chooses.
3. Five cards are then dealt out face down which will be used as community cards for everyone at the table.
4. The community cards will be used along with two hole cards to create the best possible five card poker hand.
5. After the community cards are dealt out, the players will receive their two hole cards and the player/dealer will receive their two hole cards last.
6. Players will then have the option of playing their hand. If they choose to play, they must place a wager that is 3x or 4x the “ante” wager on the “play” spot.
7. If they choose not to play their hand at this time they may give a check signal by tapping the table with their hand.
8. The dealer will then open the flop by exposing the first three community cards.

# How to Play *continued*

9. Players who haven’t played their hand yet will have the option of playing it by placing a wager on the “play” betting spot that is 2x the amount that was wagered in the “ante.”
10. Players will again have the option to check if they choose not to play their hand at this point.
11. Once all the players have acted on their hand the dealer will open the 4th and 5th community cards simultaneously. Also known as the turn and the river.
12. Players who haven’t played yet will have the option of placing a wager on the “play” spot that is of equal value to the “ante” bet.
13. If a player does not want to play his/her hand after all community cards are exposed, the hand must be folded and blind and ante bets surrendered. Any Trips bet will still be in play.
14. The dealer will now open the “player/dealers” two hole cards which will be used to create a five card poker hand. This hand will be compared to the players hands.

# Game Rules

1. A player’s blind wager must be the same value as their ante wager.
2. A player’s blind wager will be paid if their hand is a straight or higher that wins.
3. A player will only receive action on their ante bet if the player/dealer has a qualifying hand of a pair or better.
4. A player’s “trips” wager will be paid the posted odds if they have three of a kind or higher.
5. A player’s “play” wager will be paid even money if the hand is a winner.
6. If a player chooses to fold the hand and the community cards have 3 of a kind or higher, the trips wager will be paid the appropriate payout.
7. A folded hand is a dead hand and may not be retrieved.
8. All floor decisions are final.
